# RESEARCHING DIGITAL URBAN FUTURES CRITICALLY?

MAJA-LEE VOIGT & ARMIN BEVERUNGEN  
Leuphana University Lüneburg

What does it mean to do critical urban research in the age of Amazon, Facebook, and Google? In this interactive workshop, we want to gain a deeper understanding of the challenges of ethnographic fieldwork and other qualitative modes of inquiry in the context of technological and logistical urbanism. Mapping out key challenges and aiming to identify new pathways forward, we want to open up a conversation about big-tech corporate 'black boxes', algorithmic opacities and potential ethnographic workarounds.
